

DIE CUT FOAM PACKAGING SOLUTIONS

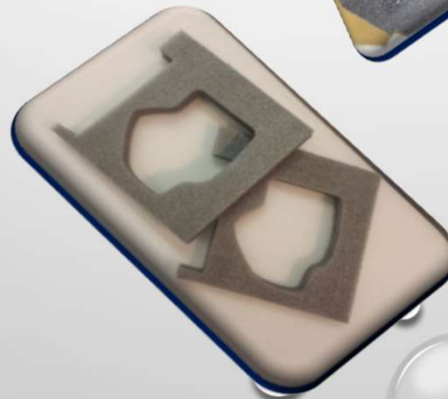

Ripplepak provides foam packaging techniques that encase the item in a customized molding to hold it securely in place within a container. Ripplepak possesses the ability to die-cut foam to our customer's unique specifications.

This method is utilized to package fragile products and components including electronics, decorative lamps, vases, porcelain, medical equipment, furniture and for other industries that require a form fitting lightweight hard packaging system

Polyethylene foam,
density from 1.25lb –
6.00lb per cubic foot
