

## Insulapak Fibre- Cold Chain Thermal Insulation

- Made from Polyethylene Fibre.
- Two piece set customized to fit any carton size.
- The inserts protects the contents against external temperature penetration.
- Custom thicknesses and lengths available to meet specific time criteria.
- Designed to be shipped flat in stackable cartons for maximum space utilization.
- The inserts cover all 6 sides within the carton.
- Helps maintain desired temperature within the carton from shipping to destination so that the contents arrives fresh.
- Being polyethylene, it will not absorb condensation nor will it mold in a damp environment .
- Non-toxic and meets food grade requirements.
- Recyclable
- For maximum effectiveness must be used with Ripplepak's Gel Packs
- Durable & Lightweight
- Samples and Pricing available upon requests.
