

FOAM POUCHES

Foam pouches are an ideal packaging aid to ensure the ultimate protection of packaged contents! They are custom made to your specifications. For those larger or more fragile items, thicker foam is available. A nonwoven polyethylene cloth can be laminated to the foam providing for both tear and puncture resistance for extra strength and durability as well as easy insertion.

Optional custom size lip with tape – If taping down the lip is required preventing the item slipping out of the pouch.

Custom made sizes allows you to design the foam pouch that perfectly suits your needs.

Protection – foam thickness provides the required protective covering.

Lightweight – reduced shipping costs.

Flat profile – they take very little storage space.

The foam pouches are perfect for protecting smaller, sensitive materials including but not limited to -

Electronic products

- Laptops
- Circuit Boards
- Ink Cartridges
- Computer Towers

Fragile products

- Smaller Lighting Fixtu
- Glass containers
- Picture Frames

Many other uses not specified. The possibilities are endless!

Anti –Static foam pouches available for electronic and similar products that are susceptible to damage by electrostatic discharge (ESD) while at the same time requiring protection for both storage and shipping. PE can be laminated to the foam which provides for easy insertion of items and stronger seals

Optional custom size lip with tape – If taping down the lip is required thereby preventing the item slipping out of the pouch.

Custom made sizes allows you to design the foam pouch that perfectly suits your needs.

Lightweight – reduces shipping costs.

Flat Profile – Foam pouches take little storage space
